Pavel Holman

AI engineer and co-founder

Prague, Czechia pavelholman@email.cz github.com/PavelHolman LinkedIn Codeforces: pj11

Engineer and co-founder who applies AI to hard problems and automates work with it. Co-founded two products and leads small teams end to end; builds agentic development tooling and LLM workflows at poqet. Three-time ICPC finalist; master's thesis at CTU on applying transformers to combinatorial problems.

EXPERIENCE

Co-founder and Principal Engineer · poqet — Jun 2026 – present

- Lead a three-person team building SLIM, a lab operations platform used by research groups at three Prague institutions.
- Built the team's agentic development harness: Claude Code with TypeScript automation, architectural guardrails and evaluations.
- Build internal LLM workflows: LangChain and LangGraph, retrieval-augmented generation over vector databases, traced with Langfuse.

SLIM slim.poqet.cz

Co-founder and Principal Engineer · DeelsCorp — May 2024 – present

- Led a four-person team that shipped Deels, a gastro marketplace used by 80 partners in Prague.
- Owned engineering end to end: Kotlin backend and GraphQL APIs, Kotlin Multiplatform and SwiftUI apps, infrastructure.
- Won a CZK 1 million grant from CzechInvest's Technology Incubation programme.

Deels deels.cz

Software Developer · Merica — Mar 2020 – present

- Led the constraint modelling for an employee rostering solver built with Google OR-Tools and OptalCP.
- Built ERP features and data loaders in C#; took part in the move from .NET Framework to .NET Core.

EDUCATION

Master's (Ing.) in Open Informatics, Artificial Intelligence · CTU in Prague, Faculty of Electrical Engineering — Sep 2025 – Jun 2027 (expected)

Thesis (in progress): **Applying Transformers to Combinatorial Problems**

Bachelor's (Bc.) in Artificial Intelligence · CTU in Prague, Faculty of Information Technology — Sep 2021 – Jun 2025

Thesis: **Forecasting energy costs in day-ahead and intraday markets**

Deep Learning and Deep Reinforcement Learning at Charles University — Feb 2024 – Jun 2026

Exchange semester at NTUST — Aug 2023 – Jan 2024

COMPETITIVE PROGRAMMING

Finalist at ICPC CERC 2024, CERC 2025 and the ICPC European Championship 2026; CTU Open problem author.

SKILLS

AI & Automation	Agentic engineering, Retrieval-Augmented Generation, LangChain and LangGraph, PyTorch, Time-series forecasting
Problem Solving	Constraint programming, Competitive programming, Functional programming
Engineering	TypeScript, Effect, Python, Kotlin, Kotlin Multiplatform, SvelteKit, PostgreSQL, C#

LANGUAGES

Czech: native · English: professional working proficiency (Cambridge English First, B2)
