Pavel Holman

AI engineer and co-founder

Prague, Czechia pavelholman@email.cz github.com/PavelHolman LinkedIn Codeforces: pj11

AI engineer and co-founder of two companies, working professionally since 2020. Leads small teams end to end and builds agentic development tooling and LLM workflows; strong in Kotlin, algorithms and data structures. Three-time ICPC finalist.

EXPERIENCE

Co-founder and Principal Engineer · poqet — Jun 2026 – present

- Lead a three-person team building SLIM, a lab operations platform used by research groups at three Prague institutions.
- Built the team's agentic development harness: Claude Code with TypeScript automation, architectural guardrails and evaluations, cutting feature development time from weeks to days.
- Automated sales prospecting: sourcing local business leads, generating template-based websites and preparing cold outreach emails for the sales team.
- Build internal LLM workflows: LangChain and LangGraph, retrieval-augmented generation over vector databases, traced with Langfuse.

SLIM poqet.cz/SLIM

Co-founder and Principal Engineer · DeelsCorp — May 2024 – May 2026

- Led a four-person team that shipped Deels, a restaurant marketplace used by 80 partners in Prague.
- Owned engineering end to end: Kotlin backend and GraphQL APIs, Kotlin Multiplatform and SwiftUI apps, infrastructure.
- Shared about 50% of mobile code across iOS and Android with Kotlin Multiplatform, reducing duplicate implementation and speeding up feature development.
- Won a CZK 1 million grant from CzechInvest's Technology Incubation programme.

Deels deels.cz

Software Developer · Merica — Mar 2020 – May 2024

- Contributed to an employee rostering solver built with Google OR-Tools and OptalCP.
- Built and tested ERP features and data loaders in C#.
- Carried out migration of core libraries from .NET Framework to .NET Core.

EDUCATION

Master's (Ing.) in Open Informatics, Artificial Intelligence · CTU in Prague, Faculty of Electrical Engineering — Sep 2025 – Jun 2027 (expected)

Thesis (in progress): **Applying Transformers to Combinatorial Problems**

Bachelor's (Bc.) in Artificial Intelligence · CTU in Prague, Faculty of Information Technology — Sep 2021 – Jun 2025

Thesis: **Forecasting energy costs in day-ahead and intraday markets**

Faculty of Mathematics and Physics, Charles University — Feb 2024 – Jun 2026

Deep Learning and Deep Reinforcement Learning

National Taiwan University of Science and Technology — Aug 2023 – Jan 2024

Exchange semester in Taipei, Taiwan

COMPETITIVE PROGRAMMING

- ICPC finalist at CERC 2024 and 2025 and the European Championship 2026
- CTU Open organizer, judge and problem author.

SKILLS

AI & Automation	Agentic engineering, Retrieval-Augmented Generation, LangChain and LangGraph, PyTorch, Time-series forecasting
Problem Solving	Constraint programming, Competitive programming, Functional programming
Engineering	TypeScript, Effect.ts, Python, Kotlin, Kotlin Multiplatform, SvelteKit, PostgreSQL, Rust, C#

LANGUAGES

- Czech: native
- English: professional working proficiency (Cambridge English First, B2)
